

EN The I Love Art LED Light Pad has a perfectly lit, ultra-flat, bright surface that is ideal for tracing, graphic works, illustrations and drawings as well as for correcting and refining sketches. Landscapes and background objects can be overlaid or motion sequences can be created for animations. Place the motif template plus a sheet of white paper on the pad so that you can see the details clearly and copy the motif under the best possible conditions.

1-Tear off the protective film

2- Put the light pad on a flat desktop, then connect the power supply.

3- Hold the power button. Brightness can be adjusted to high- medium- low

4-Once the drawing is finished, please turn off the power.

- The light pad is supplied with a USB cable for attaching to a power supply (no power supply included) Can be used with PC, laptop or power adaptor for mobile phone.
- Use a paper weight of less than 300g for better light transmission.
- Adjust the brightness to ensure optimum comfort for your eyes
- Dim the lights in the room when using the light pad for a better lighting effect.
